Technical addendum

Adenda técnica

The **protection of people** in public buildings and workplaces is essential. The design of the Buildings and the Security Systems, together with the Electrical Installations, are the elements to **ensure evacuation** in case of fire, alarm, or lack of electricity supply.

The need to provide Security Services in buildings and special areas is regulated by **national regulations**, including Emergency Lighting, Elevators, Fire Fighting Equipment, Emergency Supplies, etc. together with the Electrical Installations, with their protections, wiring and conduits.

La **protección de las personas** en edificios públicos y centros de trabajo es fundamental. El diseño de los Edificios y los Sistemas de Seguridad, junto con las Instalaciones Eléctricas, son los elementos para **asegurar la evacuación** en caso de incendio, alarma, o falta de suministro eléctrico.

La necesidad de proporcionar Servicios de Seguridad en edificios y áreas especiales está regulada por **reglamentos nacionales**, incluyendo el Alumbrado de Emergencia, los Ascensores, los Equipos Contra Incendios, Suministros de Emergencia, etc. junto con las Instalaciones Eléctricas, con sus protecciones, cableados y canalizaciones.

Standards/Normativas

STANDARD IEC 60364-7-718

Low-voltage electrical installations - Part 7-718:
Requirements for special installations or locations –
Communal facilities and workplaces.

Typical examples of communal facilities and workplaces:

- assembly halls, assembly rooms;
- exhibition halls, theatres, cinemas;
- sales areas, restaurants;
- hotels, guest houses, residential care homes;
- meeting places, airports, railway stations;
- workshops, offices, factories, high-rise buildings...

Specific requirements are established for electrical installations in buildings, access routes and escape routes

- Installations for Security Services are described in the IEC 60364-5-56 Standard.
- More demanding requirements may be included in the National Regulations.

NORMA IEC 60364-7-718

Instalaciones eléctricas de baja tensión - Parte 7-718:
Requisitos para las instalaciones y emplazamientos especiales
Instalaciones comunitarias y lugares de trabajo.

Ejemplos de edificios públicos y lugares de trabajo:

- auditorios, salas de reuniones;
- salones de exhibiciones, teatros, cines;
- áreas comerciales; restaurantes;
- hoteles, hostales, residencias de ancianos;
- centros de reuniones, aeropuertos, estaciones;
- oficinas y plantas industriales, edificios elevados...

Se establecen requisitos específicos para las instalaciones eléctricas en edificios y las rutas de acceso y las rutas de evacuación:

- Las instalaciones para los Servicios de Seguridad se describen en la Norma IEC 60364-5-56.

- Requisitos más exigentes pueden estar recogidos en los Reglamentos Nacionales

International
Electrotechnical
Commission

STANDARD IEC 60364-5-56

Low-voltage electrical installations - Part 5-56:
Selection and erection of electrical equipment - Safety services

Security services should be separated from other services and installed in such a way that security services are not affected by any breakdown that occurs in unsafe services and mitigate the effects of a fire. An example of cables installed for security services is shown in the figure:

NORMA IEC 60364-5-56

Instalaciones eléctricas de baja tensión. Parte 5-56:
Elección e instalación de los materiales eléctricos. Alimentación para los servicios de seguridad.

Los servicios de seguridad deberían estar separados de otros servicios e instalarse de tal forma que los servicios de seguridad no se vean afectados por cualquier avería que ocurra en los servicios no seguros y mitigar los efectos de un incendio. Se muestra un ejemplo de cables instalados para los servicios de seguridad en la figura:

- Safety services**

- Cable Trays or Cable Ladder on walls, in open areas, will be at a height of more than 2.5m from the ground
- Cable management systems will not reduce fire safety protection of the building structure.

REGLAMENTOS ESPAÑOLES

Instalaciones eléctricas en Locales de Pública Concurrencia;

Se aplica la norma a edificios de Espectáculos, Deportivos, Hospitales, de Reunión con más de 50 personas:

- Las instalaciones deben asegurar el Alumbrado de Emergencia y el funcionamiento de los Servicios de Seguridad
- Las Canalizaciones en zonas accesibles al público deben ser empotradas, Tubos, Canales, o Bandejas cerradas con tapa
- Las Bandejas o Bandejas de Escalera en pared, en zonas abiertas, estarán a una altura de más de 2,5m del suelo
- Las Canalizaciones no reducirá la seguridad contra incendios de la estructura del edificio.

Hospitals

A hospital is an establishment destined to the care and assistance of patients by means of medical personnel, nursing staff, auxiliary personnel and technical services 24 hours a day, 365 days a year, having adequate technology, equipment, instruments and pharmacology. There are three kinds of hospitals: First, Second and Third level, their care being from less to greater complexity. Among them, patients with affectations ranging from simple to serious, critical, palliative or even terminal care are cared for.

Hospitales

Un hospital es un establecimiento destinado a la atención y asistencia de enfermos por medio de personal médico, enfermería, personal auxiliar y de servicios técnicos durante 24 horas, 365 días del año y disponiendo de tecnología, aparatología, instrumental y farmacología adecuadas. Existen tres clases de hospitales: de Primer, Segundo y Tercer nivel, siendo su asistencia de menor a mayor complejidad. Dentro de ellos se atiende a pacientes con afectaciones que irán de simples a graves, críticas, cuidados paliativos o incluso terminales.

Hotels

A hotel is a building planned and conditioned to provide accommodation services to people and allows visitors to spend the night when they travel away from home. Hotels provide guests additional services such as restaurants, swimming pools, and nurseries. Some have conference services and encourage people to organize conventions and meetings at their establishment. The hotels are normally classified into categories according to the degree of comfort, positioning and the level of services offered.

Hoteles

Un hotel es un edificio planificado y acondicionado para otorgar servicios de alojamiento a las personas y que permite a los visitantes pernoctar cuando realizan desplazamientos lejos del hogar. Los hoteles proveen a los huéspedes de servicios adicionales como restaurantes, piscinas y guarderías. Algunos tienen servicios de conferencias y animan a la gente a organizar convenciones y reuniones en su establecimiento. Se clasifican normalmente en categorías según el grado de confort, posicionamiento y el nivel de servicios que ofrecen.

Offices

An office is a place for work. There are many ways to distribute the space in an office depending on the function and how many people will work within the same premises. There are situations in which each worker can have their own site and other examples of a large open office that can be composed of a main site with many people working in the same space.

Oficinas

Una oficina es un lugar destinado al trabajo. Existen muchas formas de distribuir el espacio en una oficina según la función y cuántas personas trabajarán dentro del mismo local. Se dan situaciones en las que cada trabajador puede tener su propio sitio y otros ejemplos de oficina grande abierta que se puede componer de un sitio principal con muchas personas que trabajan en el mismo espacio.

Shops

A shop or store business is a type of commercial establishment, where the buyer can acquire both goods and services through a monetary exchange.

Stores can focus on selling specific products such as clothing, food, or electronics, or expand their assortment to various types of items. In addition to the independent stores that operate by themselves, there are the commercial galleries and shopping centers where several stores (commercial premises) share an enclosed area.

Tiendas

Una tienda o negocio es un tipo de establecimiento comercial, donde el comprador puede adquirir tanto bienes como servicios a mediante un intercambio monetario.

Las tiendas pueden dedicarse a vender productos determinados tales como ropa, comida o electrónica, o ampliar su surtido a diversos tipos de artículos. Además de las tiendas independientes que funcionan por sí mismas, existen las galerías comerciales y centros comerciales donde varias tiendas (locales comerciales) comparten un recinto cerrado.

Public Buildings

A public building is a place which activities of some national or international, provincial or municipal administration take place, whether of a civil, military or religious nature are developed. Palaces, ministries, councils, town halls, captaincies and temples are considered public buildings. Those buildings with historical or cultural reasons such as museums or official university or secondary education buildings are also considered.

Edificios públicos

Un edificio público es aquel en el que se desenvuelven actividades de alguna rama de la administración nacional o internacional, provincial o municipal, ya sea de índole civil, militar o religiosa. Se consideran edificios públicos los palacios, ministerios, diputaciones, ayuntamientos, capitanías y templos entre otros. Son considerados también aquellos edificios con razones históricas o culturales tales como museos o edificios de enseñanza universitaria o secundaria oficial.

Singular Buildings

These are all those emblematic constructions that characterize a place and that are “unique” due to their dimensions, their use, the methodology or form of construction or projection, the motivation behind their elaboration, etc. They tend to be buildings “special”, often emblematic and often oriented to services, leisure or conservation of the city’s historical heritage.

Edificios singulares

Se trata de todas aquellas construcciones emblemáticas que caracterizan un lugar y que resultan “singulares” por sus dimensiones, por su uso, por la metodología o forma de construcción o proyección, por la motivación que está detrás de su elaboración, etc. Suelen ser edificaciones “especiales”, con frecuencia emblemáticas y a menudo, orientadas a servicios, ocio o conservación del patrimonio histórico de la ciudad.
