-To set-up two trays, two union joints and 8 bolt sets B3 are needed.

- The tray installation for an electrical system should NOT run under other types
of canalisations such as water, vapour or gas.
- To guarantee a good ventilation we recommend installing the trays keeping a
minimum distance of 250 mm between each tray.
- Trays which are placed on supports shall have to keep a gap of 20 mm from
the wall to allow for a correct ventilation of the cables.

## Accesories:

BSL cable ladders have a large range of accessories: horizontal bends, vertical internal/external bends, TE/CROSS derivations, union joint, horizontal adjustable union joint, vertical adjustable union joint and bracket.

Standard radius: 300 mm .
Special radius under request: 600 mm and 900 mm

## SAFE WORKING LOAD

Standard Load Ratings acc. to NEMA VE1:

|  | Span m (ft) |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | $4,3(14)$ | $4,9(16)$ | $5,5(18)$ | $6,0(20)$ |
|  | Safe working load kg/m (lb/ft) |  |  |  |
| BSL H100 | $98(66)$ | $75(50)$ | - | - |
| BSL H125 | $172(116)$ | $132(89)$ | $104(70)$ | $87(59)$ |
| BSL H150 | $223(150)$ | $171(115)$ | $135(91)$ | $113(76)$ |
| BSL H200 | $342(230)$ | $262(176)$ | $207(139)$ | $173(117)$ |

| Clasification |  |
| :--- | :---: |
| BSL H100 | $12 \mathrm{~B}-16 \mathrm{~A}$ |
| BSL H125 | $12 \mathrm{C}-20 \mathrm{~A}$ |
| BSL H150 | $16 \mathrm{C}-20 \mathrm{~B}$ |
| BSL H200 | 20 C |

NOTE: 1,5 Safety factor considered.
